the Annual Richards
HOLIDAY CHEMISTRY LECTURE
(bring a non-chemist!)

PLEASE POST

Dr. Bassam Z. Shakhshiri received his undergraduate degree from Boston University and his graduate degrees from the University of Maryland. In 1983, he became the youngest recipient of the prestigious Norris Award for excellence in the teaching of chemistry and in 1986, received the Chemical Education Award of the American Chemical Society. He is the author of a critically acclaimed series of books on chemical demonstrations. Once again, Dr. Shakhshiri brings to New England some demonstrations from his most popular and internationally renowned dramatic, exciting and instructive programs, accompanied by some all-new demonstrations by his elf-assistants.

This program is made possible in part through the Corporate Affiliates Program of the Northeastern Section, American Chemical Society:

Corporate Patrons:

DuPont - Merck Pharmaceutical Company
W. R. Grace & Company
Hoechst Celanese Corporation
Polaroid Corporation, Chemical Research Division
