

Concert at Chemistry

*Linking Science and
the Performing Arts*

Bassam Z. Shakhshiri & Rodney Schreiner
University of Wisconsin-Madison Department of Chemistry

Music Professor Christopher Taylor
on Piano

Music Professor Marc Fink on Oboe
Science Student and Chamber Musician Krista Stewart on Violin
Chemical and Biological Engineering Professor John Yin on Violoncello
Chemistry Professor John Berry on Viola

Creativity, passion, and the urge for expression and for exploration are essential human qualities that inspire science, the arts and the humanities, and thus constitute a common bond among them. Science enriches and benefits our daily lives, and leads to personal and societal enlightenment. Music is one of the fundamental ways through which humans bond with each other, it tickles our brains and it connects our hearts. This concert was conceived and is sponsored by the Wisconsin Initiative for Science Literacy (WISL). One of the goals of WISL's Science, the Arts and Humanities program is to showcase our faculty and students at their best in the laboratory and in the performing arts.

Science and Music Student Kirstin Ihde on Piano
Music Student Stephanie Frye on Tuba

Score from the world premiere sonata by
chemistry professor John Berry.

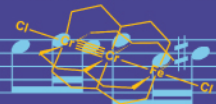

Sonata for Tuba and Piano John F. Berry

Music & SCIENCE

The WISCONSIN INITIATIVE FOR SCIENCE LITERACY presents

Concert at Chemistry

Thursday, March 12, 1:15 pm
Seminar Hall, Room 1315 Chemistry

A musical performance by science faculty, students, and colleagues from the University of Wisconsin-Madison, featuring
Professor John F. Berry, chemistry Krista Stewart, pre-med undergraduate
Professor John Yin, chemical engineering Stephanie Frye, music graduate student
Professor Marc Fink, music Karstin Ihde, music graduate student
Professor Christopher Taylor, music

and the world premiere of
Sonata for Tuba and Piano
by chemistry Professor John F. Berry

WISL

Sponsored by the Science, Arts, and Innovation program of the
WISCONSIN INITIATIVE FOR SCIENCE LITERACY
